

第 211 回フロンティア材料研究所講演会

Lecturer: **Angel M. Arévalo-López (CNRS, UCCS)**

Nov. 27 (Thur.) 13:30- @J1-809

Title: High-pressure synthesis and magnetic properties of a couple of interesting oxides.

In this talk I will show some of our recent results on three different set of materials but with the common ingredient of being synthesised via high-pressure techniques. I will also describe their x-ray, neutron and electron diffraction along with their magnetic properties and the help from DFT to interpret them.
